

Quality, Environmental and R&D&I Policy

Ontech Security SL, a company devoted to the design, development, prototyping and industrialization of electronic detection devices, is aware of the importance of the degree of satisfaction and fulfillment of the needs of our stakeholders and of the ambient management of our processes.

Therefore, the following aims are established:

- The full satisfaction of the client and others stakeholders, through the design and supply of products that meet their expectations, and even exceed them, throughout their useful life.
- The reduction of the environmental impact and the pollution in our manufacturing processes through the implementation of the Ecodesign process, in the development of our products, by means of the environmental management of the environmental aspects in their design process. Likewise, we are committed to comply with the environmental, legal or design requirements that are applicable to our products.
- Continuous improvement of the environmental performance of the organization's products and services, throughout their life cycle, without transferring adverse environmental impacts from one stage of the life cycle to another, unless this results in a net reduction of negative environmental impacts throughout the life cycle of the product.
- Promote Ontech's collaborators and supplier's compliance with the company's requirements regarding Quality, Environment and Research, Development and Innovation management systems to achieve the effectiveness of the processes.
- Work continuously to raise awareness among staff about the detection of preventive actions outlined in the Integrated Management System.
- Ontech promotes the generation of ideas to achieve the development of innovative projects that grow our technological industrial property and our intangibles in a sustained way to achieve technological leadership in Research and Development.

For its achievement, Ontech is committed to the fulfillment of all the requirements, legal or subscribed, associated with our activity, since all the people of our organization participate actively in the achievement of these aims. All of the above guided by a permanent environment of continuous improvement, in which environmental respect and the elimination of waste and variability, lead us to the excellence of our processes and products.

This Quality, Environment and R&D&I Policy is mandatory for all Ontech staff.
